## Split System Cooling Units

A new standard for the air conditioning industry, Trane sets new appearance and new standard for **Serviceability... Installability... Reliability... and Flexibility** for all applications in split system air conditioning.

### Design for You

Trane consulted its customers during the split system design phase to bring a product to the market place which would meet job needs every time.

### Quality and Reliability

- Scroll compressors are available from 5 to 20 tons with excellent reliability and high efficiency.
- All units are 100 percent run tested prior to leaving the production line.

### System Performance Matrix

Outdoor	Indoor	Evaporator	Total Capacity
Unit	Unit	cfm	MBH
TTK060KD	TTH060BD	2,000	60
TTA075RD	TTH075BD	2,500	75
TTA100RD	TTH100BD	3,400	100
TTA120RD	TWE120AD	4,000	120
TTA150RD	TWE180BD	6,000	160
TTA200RD	TWE240BD	6,650	200
TTA240RD	TWE240BD	8,000	240

Notes : 1. Matched system ratings are ARI 360. Full load rating is at 95°F, entering condensing air temperature and 80/67 FDB/FWB entering air handler coil.  
2. Indoor fan power accounts for ARI 360 required external static pressure and loss associated with air filter, casing and wet evaporator coil pressure.

### Manifolding Scroll Compressors Option (TTA150-240RD)

- The key to this system is an oil equalized line connecting the two compressors. In addition, the discharge lines are simple manifolded together.
- Efficiency and proven Technology. A manifolded set of compressors is more efficient at part load than the compressors with independent circuits.
- Manifolded to be single circuit provides cost and time saving for installation.

### Maximum Efficiency

- Lower noise operation and higher efficiency with the new generation higher EER Scroll Compressor.
- 64% fewer parts than a comparable capacity reciprocating compressor.
- Single rotating assembly minimizes the friction and mechanical losses.
- Smooth operation, similar to a centrifugal compressor, give low torque variation and extend motor life, and minimal vibration reducing wear.
- Solid mount with no internal suspension to be worn out.
- Integral inlet dirt separator removes contaminants.
- Rolling element bearings for higher efficiency reduced friction. No suction or discharge valves for improved efficiency compared to a reciprocating compressor.

### Flexibility

Trane Split System offers single and dual compressors allowing the right equipment to be matched to the job application and save on operating cost.

### Convertibility

Trane air handler can easily be converted for vertical or horizontal airflow in free blow and ducted applications.

### Installation

- Compact design makes smaller footprint in the market so we can save the area cost.
- Installation is simplified through fully factory packaged assembled indoor and outdoor units. Ready to run when they arrive at the jobsites.

### Ease of Service

Reduction of service time and cost through

- Single side access on condenser.
- Multiple removable panels on air handlers.
- Colored and numbered wiring.
- Service valves.
- Dual circuits allow for comfort cooling even during service time. (TTA150-240)

### Trane Split System Units

- A reputation for quality and reliability.
- Improvements in efficiency, flexibility and installation.

### Service in mind

In addition to product commissioning and warranty coverage, Trane's After Sales Department proposes maintenance contracts tailored to each client's individual needs as well as programmes for upgrading older equipment to the latest technologies.

**Extended service for a constant optimization of your equipment performance.**

TTK060KD

TTA075-120RD

TTA150-240RD

TTH060-100BD

TWE120-240BD

## Feature and Benefits

### TTA Condensing Units

#### Features

- Powder paint finish.
- Innovative cabinet design.
- Refrigerant accessories as standard.
- Single and dual compressors

#### Optional

- Copper fin / Blue fin.
- Manifolding single circuit (for TTA150-240RD).

#### Benefits

- Full covering of all edges and a uniform paint finish for a smooth, attractive and durable cabinet exterior.
- The most attractive light commercial condensing unit available.
- Each unit ships standard with the service valves, hi-low pressure controls, liquid line filter drier.
- Optimized operation and reduced service time.
- Designed to provide corrosion protection on sea coast application.
- More efficiency at part load.

### TTH/TWE Air Handler Units

#### Features

- 500 mm in height (TTH060-100).
- Excellent drain pan.
- Belt drive.
- Factory installed mounting channel (TTH060-100).
- Quiet operation.
- Convertible for horizontal or vertical configuration (TWE120-240).
- Thermal expansion valve. (Except TTH060)

#### Optional

- Discharge Plenum.
- Return air grille (for TWE model only).
- High static motor.

#### Benefits

- Designed to fit easily into tight ceiling spaces.
- Specially designed drain pan with a deep pitch to catch and drain water safely away.
- Fully adjustable airflow for application versatility and ease of servicing.
- Supports the unit from below, and saves time and money for the installer.
- Well-insulated cabinet with wide forward curved fans provide quiet operation.
- Maximum application flexibility without the extra inventory of dedicated models.
- For maximum application flexibility and performance, capacity modulation provides improved comfort and backup in the event of a malfunction with one circuit.
- Designed for free blow application.
- For high static pressure applications.
